## Mankind and shores Exhibition

## Journey on the High Seas Exhibition

In order to continue to offer a quality experience to its visitors, Nausicaá is renovating and modernizing its facilities as it goes.

This is the reason why, from November 07, 2022, a small part of the visit route (the tropical lagoon area) of the "Des Rivages et des Hommes" exhibition will be closed for work of a duration of approximately one year.

**A large part of this exhibition will therefore remain open and accessible to the public:**

- the sea lion reserve
- the touch tank
- History of islands
- Stopovers in the Mediterranean
- Voyages in the Northern seas
- The Thalassa: experience life on a boat on the raging sea as if you were there!
- the submerged forest and its spectacled caimans...

**The exhibitions "Voyage en Haute Mer" and "Dans l'oeil du Climat" remain fully open to the public.**

You will also be able to benefit from our **new augmented reality experience "the giant of the high seas"** included in the price of the entrance ticket, not to mention the activities that mark out the route: sea lion training and feeding of the different species.
